- Interactive, hands-on exercises
- Performance-based pre/post-tests
- Custom learning path
- Learning management system
- Detailed performance data
- Teacher's & Student Guides
- Certificates of Achievement

"Using Teknimedia's computer skills courses is like having another teacher in the classroom. The intuitive software allows each student to learn at their own pace, which frees the teacher up to work with students who need additional instruction. Teknimedia courses also teach students different approaches to accomplishing several tasks using visual, audible and tactile demonstrations that the student can replay as often as they need to learn the material. I highly recommend Teknimedia courses to any teacher."

M. Kamp, Metro-Davidson County Detention Center, Nashville, Tennessee

"The Teknimedia Software Packages are still some of the best computer education software on the market today... Students love the interaction and immediate feedback given by these software programs. I would like to personally thank Teknimedia for making such user-friendly software packages."

R. Wright, Ordinance Road Correctional Center, Annapolis, Maryland
